**Amendments to the Claims**

This listing of claims will replace all prior versions and listings of the claims in the application:

**Listing of Claims**

Claims 1 - 22 (cancelled)

23. (previously presented) A print media product comprising:

a substrate; and  
at least one ink-receiving layer supported by said substrate, said ink-receiving layer being comprised of a plurality of binder compositions, said plurality of binder compositions comprising a first binder comprised of gelatin, a second binder comprised of a poly(vinyl alcohol-ethylene oxide) copolymer, and a third binder comprised of a copolymer of at least one polystyrene, at least one polyalkyl methacrylate and at least one polyalkyl acrylate.

24. (previously presented) The print media product of Claim 23 wherein said ink-receiving layer is comprised of about 10 - 30% by weight said first binder.

25. (previously presented) The print media product of Claim 23 wherein said ink-receiving layer is comprised of about 30 - 55% by weight said second binder.

26. (previously presented) The print media product of Claim 23 wherein said ink-receiving layer is comprised of about 10 - 30% by weight said third binder.

27. (previously presented) The print media product of

Claim 23 wherein said ink-receiving layer further comprises at least one pigment therein.

28. (previously presented) The print media product of Claim 27 wherein said ink-receiving layer is comprised of about 5 - 40% by weight said pigment.

29. (currently amended) The print media product of Claim [21 where] 23 wherein said plurality of [binders] binder compositions further comprises at least one additional binder therein which is different from said first binder, said second binder, and said third binder.

30. (previously presented) The print media product of Claim 23 wherein said print media product further comprises at least one additional material layer.

31. (previously presented) The print media product of claim 23 wherein said print media product further comprises at least one ingredient selected from the group consisting of defoamer compositions, biocides, hardeners, UV/light stabilizers, buffers, slip agents, pH control compounds, preservatives, and lactic acid.

32. (previously presented) The print media product of Claim 30 wherein said additional material layer is located between said substrate and said ink-receiving layer, said additional material layer comprising at least one composition therein selected from the group consisting of at least one pigment, at least one binder, and a mixture thereof.

33. (previously presented) A print media product comprising:

a substrate; and  
at least one ink-receiving layer supported by said substrate, said ink-receiving layer being comprised of about 10 - 30% by weight of a first binder comprised of gelatin, about 30 - 55% by weight of a second binder comprised of a poly(vinyl alcohol-ethylene oxide) copolymer, and about 10 - 30% by weight of a third binder comprised of a copolymer of at least one polystyrene, at least one polyalkyl methacrylate and at least one polyalkyl acrylate.

34. (previously presented). A print media product comprising;

a substrate; and  
at least one ink-receiving layer supported by said substrate, said ink-receiving layer being comprised of:  
a first binder comprised of gelatin;  
a second binder comprised of a poly(vinyl alcohol-ethylene oxide) copolymer; a third binder comprised of a copolymer of at least one polystyrene, at least one polyalkyl methacrylate and at least one polyalkyl acrylate;  
an additional binder comprised of methylhydroxypropyl cellulose;  
a first pigment comprised of silica; and  
a second pigment comprised of polystyrene beads.

Claims 35 - 44 (cancelled)
